To Whom it May Concern:

I, Susan Sharpe, have been a professional dog trainer for over 20 years and TTouch practitioner for over 3 years. I'm also the developer of the Anxiety Wrap™ a therapeutic wrap that helps end thunderstorm fear in dogs as well as other animals based on the principle of maintained pressure. In the past I have used head halters that includes the Snoot Loop, Halti & Gentle Leader.

The reason for my use of head halters is because I've found them to be a particularly useful tool in allowing the handler to control the dog's body by way of the dog's head. The things I didn't like about the head halters I've used in the past vary from cumbersome to binding, not holding it's fit, uncomfortable for the dog and even breakage due to, what I believe is, inferior materials. All this results in the dog fighting acceptance of the head halter and therefore aggravates the training. I'm now using the Comfort Trainer because I find fitting the dog much easier, the materials used in it's construction are obviously superior to the others and the design allows for comfortable positioning on the dog's head. This combination allows the dog to accept the head halter much quicker, which increases training potential.

There is currently nothing else on the market like it, due to the above reasons. Although it costs me more than the other head halters, I prefer to use the Comfort Trainer because I care about the dogs and the people trusting me with their animals.

Sincerely,

Susan Sharpe
